Subject: GenX Quantitative Method Paper for Journal of Chromatography B
Attachments: EPA QA Package.zip; GenX_Manuscript_Final.docx; GenX_SI_Final.docx; Manuscript_Figure 1.png; Manuscript_Figure 3.png; Manuscript_Figure 4.png; Manuscript_Figure2.png; Manuscript_Table1.xlsx; Manuscript_Table2.xlsx; Manuscript_Table3.xlsx; SI_Figure4.png; SI_Figure5-1.png; SI_Figure5-2.png; SI_Figure5-3.png

I have put together a manuscript package for J. Chrom. B detailing quantitative methods for GenX and related PFECA compounds, using some of the publicly released GenX quantitation data as an application, and including the validation for our internal SOP as a single laboratory validation. A referenceable product should greatly aid collaborators and others nationwide who want to do similar and follow-up work. I've attached the submission packet for the journal, as well as a zip file with the internal 363 reviews and QA document to be forwarded to QA review once you all have given it an okay.

It's a present for Myriam when she comes back.
